

NOSE GEAR BOTTLE JACK KIT

P/N: AP-XXX070-1

Product Overview

Our nose gear jack was developed to aid in quick nose wheel changes on the flight line or in the hangar with ease of transport and service. The jack is light weight, uses a hydraulic fluid commonly found in the aviation industry, and has a handle retention system to ensure it is never separated and lost. Further, it is versatile, and can be used on the following aircraft:

Fitments: Boeing B717, B737

Airbus A319, A320, A321

Others that meet weight limit and extension height specifications

(Note: Aircraft must have nose gear jack pad provisions)

Notable Features:

- Ellipsed load rest
- Nitrided ram
- 24,000 lbs (12 ton) capability
- Range: 8-1/2" collapsed height, 14-1/2" extended height
- Base width: 5 3/4"
- Serviceable with Mil-H-5606 hydraulic fluid
- Lightweight for the hangar and the flight line
- Kit is expandable to accommodate P/N: 1902 and P/N: 1922 wheel sockets
- Incorporates jack handle retention
- Made in USA
- Repairable and replacement parts available
- Lowest price for the application
- C of C available
- 1 year limited warranty
